Interactive Symposium on Peritoneal Cancer

September 12, 2018
Lausanne University Hospital

Auditorium Mathias Mayor
Bugnon 46, CH-1011 Lausanne

This course is accepted as post-graduate training
by the Swiss Society of Surgery (points 7)

Welcome!

Dear Colleagues,

Peritoneal cancer remains a diagnostic and therapeutic challenge, and prognosis for most affected patients is dismal. Joined efforts and multidisciplinary teamwork are most likely to result in improvements of outcomes focusing not only on survival but also on tolerance and quality of life. This symposium aims to bring together experts from oncology, surgery, gynecology, radiology, radiation oncology and pathology to present current standards and future developments for the care of patients with peritoneal cancer. Prominent experts from France, Germany, USA and Japan will complement the in-house panel.

Interactive discussions of challenging cases are placed in the center of the event, and active participation of everybody is strongly encouraged to make this symposium not only instructive and useful but also enjoyable!

PD Dr Martin Hübner

Prof. Nicolas Demartines

Program 12th September 2018

Interactive Symposium on Peritoneal Cancer

8:30 - 9:00 Welcome, coffee, croissant

Overture

9:00 - 9:15 Welcome: Why we need to come together *S. Peters / N. Demartines*

1. Act **Treatment modalities for peritoneal disease** *S. Peters / N. Demartines*

- 9:15 - 11:00
- Systemic chemotherapy: the gold standard!? *J. Franko*
 - Hyperthermic Intra Peritoneal Chemotherapy: towards cure! *O. Glehen*
 - Pressurized IntraPeritoneal Aerosol Chemotherapy: hype or hope? *M. Reymond*
 - Combined systemic and intraperitoneal catheter chemotarypy: a breakthrough! *H. Ishigami*

11:00 - 11:30 Coffee break

Intermezzo **Consult the experts:** J Franko, O.Glehen, M Reymond, H Ishigami

11:30 - 13:00 Interactive case discussions (3 cases) *O. Sgarbura / M. Hübner*

13:00 - 14:00 Lunch break and visit of industry exhibition

Preludium

13:00 - 13:15 How Columbus came to discover America *M. Hübner*

2. Act **Imaging and treatment algorithms** *O. Glehen / P. Mathevet*

- 14:15 - 16:00
- Imaging: diagnosis, staging and assessment of treatment response *C. Dromain*
 - Peritoneal spread from ovarian origin: How I treat it! *C. Tempfer*
 - Peritoneal spread from colorectal origin: How I treat it! *O. Sgarbura*
 - What about immunotherapy and radiotherapy? *G. Coukos / F. Herrera*

16:00 - 16:30 Coffee break

Epilogue **Consult the experts:** C. Dromain, C. Tempfer, O. Sgarbura, G. Coukos

16:30 - 18:00 Interactive case discussions (3 cases) *M. Reymond / N. Demartines*
